

**GETTING IT RIGHT
THE FIRST TIME**

Bryan Monesi, Jody Young and Don Monesi
Monesi Trucking and Equipment Repair
Columbus, Ohio

You could call **Don Monesi**, founder and owner of **Monesi Trucking and Equipment Repair**, the "truck whisperer." According to his wife **Marlene**—co-owner of Monesi Trucking—Don has a special talent for fixing things since he has more than 40 years of experience, although Don originally worked in the heavy construction industry before buying a wrecked dump truck in 1985.

"Don is amazing. There's nothing he can't do. He can look at or listen to any piece of equipment and diagnose a problem immediately, whether it's a grader or a backhoe or a dump truck or a pickup truck," Marlene said. "We've gone from a couple of trucks to a fleet of 35."

Monesi Trucking hauls gravel, asphalt and dirt to construction sites throughout Central Ohio with their fleet of dump trucks. They primarily haul from the quarry to a construction site, although when there's a dig-out job, they'll take the material to a dump or wherever the client wants it taken.

"We can call our Sterling dealer contact, and he'll help us diagnose our trucks over the phone."

Monesi Trucking works with **Buckeye Western Star and Sterling** for its parts and service needs. **Mike Thompson** and **George Ritter** are on call for Monesi.

"George and Mike are both just great. We can call them up, and they'll help us diagnose our trucks over the phone," said **Bryan Monesi**, general manager for Monesi Trucking and son of Don and Marlene. **Jody Young**, Monesi's top mechanic, is Don's right-hand man. With several mechanics of their own on staff, Don, Jody and Bryan rely on Buckeye for their all-makes parts.

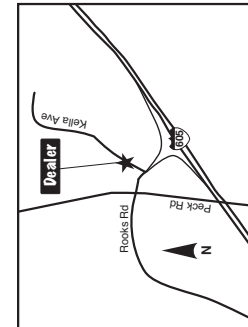

"They have a tremendous parts inventory that always meets our needs," Bryan said. "The availability of parts has always been superior, which is critical for us."

Great work, Monesi Trucking—Sterling and Buckeye Western Star and Sterling wish you many more years of success!

AVOIDING WILDLIFE ON THE ROAD

While many drivers have encountered wildlife on the road, a few precautions may help prevent contact or keep a collision from turning into a more serious accident.

- ▶ When confronted with an animal in your path, brake to reduce the damage, even if the animal is on the roadside.
- ▶ If you can't decelerate or stop safely, staying in your lane and hitting the animal is preferred to losing control of your truck and causing a bigger accident.
- ▶ Pay attention to deer or wildlife crossing signs because placement of the signs is based on historical patterns of movement.
- ▶ Be careful during "red hours" between midnight and 5:00 a.m. when wildlife is on the move and looking for food and visibility is diminished.
- ▶ Raise awareness of animals during certain months. Mating and movement increases sharply in October and November.
